Stonelick Williams Corner Covered Bridge Rehabilitation

Bridge # C116-1.21

Regarding the Rehabilitation of the Stonelick Williams Corner Covered Bridge

CLERMONT COUNTY, OHIO – The Board of Clermont County Commissioners has awarded the construction contract to The Righter Co. Inc. from Columbus, Ohio. This company has extensive construction and rehabilitation experience with covered bridges. Visit www.rightercompany.com for additional information on this contractor.

Bids were opened on June 6th with four bids being submitted, the results were as follows:

Coopers Excavating	\$662,799.25	(Bid was rejected due to not meeting minimum qualifications for this type of construction)
The Righter Co.	\$687,643.80	
HGC	\$756,895.70	
RC Construction	\$787,769.20	

The Rehabilitation of the Stonelick Williams Corner Covered Bridge includes the removal and replacement of the roof and exterior siding, additional structural support members to improve the load capacity, deck replacement, new lighting system and security system.

Construction will start in early November of this year. The construction will take approximately six months which will allow for the timber and steel work to be done throughout the winter and temperature dependent items to be completed in the spring. We greatly appreciate the support and understanding of the public and county/township officials throughout this extensive design and construction process. We are looking forward to the successful rehabilitation of the last covered bridge in Clermont County!
